South's Leading Nursery

Shaded Container Area

To The Trade . .

Rapidly, we are climbing to the heights of being classified as Nurserymen. Hours of planning, experimental research, close observation of the trade's demand, has enabled us to produce quite a quantity of plant material in excellent quality adapted for the Southland.

We are quite proud of our large container-grown area in which we have approximately one-quarter million plants representing some 60 varieties. This service has proven to be very helpful to us and our friends of the trade. We are still expanding this field.

We are most grateful for your past patronage and the individual advertisements given to our place. It is our sincere hope that these relations will continue. Your inquiries will be more than appreciated.

Most sincerely,

SOUTHERN STATES NURSERIES, INC.

Terms and Conditions

TERMS: We offer usual terms to those of known responsibility. Where the purchaser's credit responsibility is unknown to us, cash is required before shipping, or references must be furnished with proper time for investigation. On all C. O. D. shipments one-fourth cash must accompany your order.

PRICES: All prices listed are F. O. B. our nursery. Packing at cost. We will accept order 5 at the 10 rate, 50 at the 100 rate, 500 at the 1000 rate. Prices listed herein are subject to change without notice, and are made for immediate acceptance. On reserve orders we require a twenty-five per cent deposit.

SHIPPING: Customers are requested to give definite instructions. We ship by Rail, Freight, Motor Freight, Express and Boat lines.

CLAIMS: All claims must be made immediately upon receipt of stock. While we use every means of prompt service, we will not be responsible for delays in transit. Our responsibility ceases upon delivery in good condition to the transportation company.

SUBSTITUTIONS: We never make substitutions on orders unless instructed by the purchaser.

GUARANTEE: We guarantee our stock to be well grown, true to name, properly packed and shipped according to instructions. In no case shall our liability be more than the original invoice.

CAUTION: We accept all orders subject to crop conditions and on condition that same be void if such occurs beyond our control. If you do not find the stock you desire listed, write us and we will get it for you. Many times our quantities will not permit us to list items.

AZALEA (INDICA)

All of our Azaleas are pruned, compact, specimen plants. We are limited in quantity and variety so we urge ordering early.

COCCINEA MAJOR—Brilliant orange red, good foliage and grower. Size 8-12".

DUC de ROHAN—One of the better varieties for potting. Compact grower with light green foliage. A very profuse bloomer. Size 8-12".

PINK ELEGANS—Early bloomer of light pink. Good upright grower — similar to Formosa. Sizes 12-18", 18-24".

FIELDERS' WHITE—One of the finest whites. A good grower, large foliage and pure white flowers. Sizes 8-12", 12-18".

FORMOSA—Vigorous grower — common but we think best of all and most popular. Good for landscape designs. Hardy and requires least care. Will thrive in varied soil conditions. Sizes 8-12", 12-18", 18-24" and 2-3'.

GEORGE FRANC—Early bloomer with flowers of salmon-pink completely covering the plant. Size 8-12".

GLORY OF SUNNINGHILL—Compact grower with shiny narrow leaves and vivid orange-red flowers. One of the latest to bloom. Size 8-12".

GEORGE LINDLEY TABOR—Large lavender-pink flowers. A wonderful grower and very hardy. Sizes 8-12", 12-18", 18-24".

IVERYANNA—Low compact grower. Late bloomer with large white flowers with pink stripes. Size 8-12".

LAWSAL—Mid-season, profuse bloomer of salmon flowers. Very showy and good grower. Sizes 8-12", 12-18" and 2-3'.

NEW INDICA WHITE—Compact grower with dark green foliage. Pure white large flowers. Good for borders. Size 8-12".

OMURSAKI—Very upright and vigorous grower. One of the old lavender favorites. Large flowers. Sizes 12-18", 18-24", 2-3', 3-4' and 4-5'.

PHOENICA—Vigorous, upright grower. Medium-sized foliage of a dark green color, large purplish-pink flowers. Sizes 8-12", 12-18" and 2-3'.

PRIDE OF DORKING—Our favorite of all red Azaleas. A wonderful variety for color, foliage and growth. Size 8-12".

PRIDE OF MOBILE—Similar to Elegans. Flowers a little larger and brighter pink color. A good grower but more compact than Elegans. Very popular with everyone. Size 8-12".

PRIDE OF SUMMERVILLE—Very good grower and wonderful foliage. Large salmon flowers. Sizes 8-12" and 12-18".

SUBLANCEOLATA RHODALEA—The best of all orange-red azaleas. Strong grower with large flowers in beautiful color. Generally blooms singular and throughout season. Its popularity cannot be excelled. Sizes 8-12" and 12-18".

SUBLANCEOLATA ROSEA—Similar in growth but leaves are a little smaller. Dull, fascinating large pink flowers. A must in every nursery. Sizes 8-12" and 12-18".

Prices on Indica Azaleas:

		per 10	per 100	per 1000
8-12 inches.....	B&B	\$ 6.50	\$ 60.00	\$550.00
12-18 inches	B&B	10.00	90.00	
18-24 inches	B&B	13.50	115.00	
2-3 feet	B&B	19.00		
3-4 feet	B&B	35.00		

NOTE: Balled Azaleas without burlap 15¢ less per plant.

“Field Grown Formosa”

AZALEA INDICA (Liners)

We have several thousand very nice, pruned, two-year bed-grown liners in the following varieties: Formosa, Southern Charm, Fielders White, President Clays.

2 year liners (8-12")..... \$1.25 \$ 10.00 \$ 85.00

CAMELLIA JAPONICAS

Presently, we have discontinued the growing of Camellia Japonicas in open ground. We are putting several thousand in cans which should be ready another season, Fall of 1953.

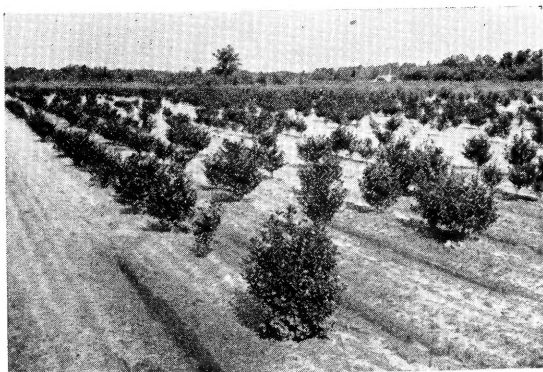

CAMELLIA SASANQUA

(Field Grown)

One of the finest of all Broad-leaved Evergreens. A member of the Camellia family, but looser and faster growing. Very profuse bloomers, flowers opening in early September and extending through November — a time when flowers are scarce.

We have many testimonials claiming our plants acclimate themselves better and quicker to most soils of any Sasanquas purchased. Sasanquas are very hardy and can be grown without much protection in the areas around Atlanta, Memphis, Charlotte, Birmingham and farther on the Atlantic Seaboard. Prices run parallel with ornamental shrubbery.

“Field Grown Sasanquas”

ANNETTE—Two-tone pink and white variegated. Dense growth, flower petals have crepe paper-like formation.

BUTTERFLY—Flowers large single flesh pink. Wonderful foliage and good grower.

CLEOPATRA—Large, beautiful cherry-red flowers and crinkled petals, foliage dark, glossy green and thick. Vigorous grower, yet compact.

MINE-NO-YUKI—(Snow on the Mountain) Large, double white flowers resembling a carnation. Such bloom profusion that it literally covers the plant. When young, it is a loose open grower. As it ages it develops into a symmetrical round and compact specimen.

ROSEA—A graceful and upright grower with flowers of brilliant pink. Dark green foliage.

SETSUGEKKA—A new variety of great beauty and merit. The large, semi-double flowers are pure white, with just a touch of pink at the ends of the slightly ruffled petals. The plant is erect and compact in habit, with dark, handsome foliage. Very valuable.

SINGLE WHITE—Small flower and foliage good. Upright grower.

Prices on Sasanquas:

		per 10	per 100	per 1000
12-18 inches	B&B	\$13.50	\$125.00	\$1150.00
18-24 inches	B&B	16.50	150.00	1350.00
2-3 feet	B&B	20.00	175.00	
3-4 feet	B&B	30.00	250.00	

ROSES

LOUIS PHILLIPPE—Should be considered one of the finest landscape ornamentals. In the south-land, this variety is very much an ornamental and can be used very effectively in mass plantings or hedges. It has very beautiful foliage the year round and blooms continuously. We often call this the Landscape Dream and consider it a specialty of ours.

CLIMBING LOUIS PHILLIPPE—Same as above but a climber — very nice in trellis work.

CLIMBING MARECHAL NEIL—The south's old favorite yellow rose, very fragrant and an everlasting variety.

		per 10	per 100

FRUIT TREES

We have the largest supply of fruit trees yet grown by us, especially in varieties of citrus. Careful attention is given to the growing of fruit trees by us — all stake grown. Look under container grown material for trees in cans.

2-3 feet	8.50	75.00

B&B, double above prices.

JASMINE SAMBAC (See Page 20)

LIGUSTRUM

Grafted Ligustrum in all varieties are very scarce this season and we urge all of our customers to see about their needs immediately. We have our usual wide variety but very much limited in quantity.

Grafted Ligustrum are far superior to rooted ones because of their escape from Nematodes (root-knot). The foliage is darker, more glossy and irregular in shape, which gives it more effective beauty. Grafted Ligustrum are outstanding in all varieties.

Grafted Ligustrum — "Our Specialty"

LIGUSTRUM LUCIDUM (Trimmed bushy)

specimens)		per 10	per 100	per 1000

4-5 feetB&B	32.50	300.00

Our Introduction

LIGUSTRUM ERECTA

Results from this variety has exceeded our predictions. The description which we gave does not do this variety justice as to its beauty. Everyone heralds this as a wonder in plant introductions. There is definitely a place for this new variety of ours in every landscape design.

Ligustrum Erecta

Handsome

At sight the Erecta resembles the Coriaceum variety, but from a closer view, it looks more of a cross between Nobilis and Iwata. This upright variety has four to one more leaves on its branches than other Ligustrum. After the leaves are mature, there comes at the base of each leaf a much smaller one that completes the denseness of this plant.

Our Erectas are very scarce this season because of demand. Order early.

DOGWOOD (sold for this season).

HOLLIES

Our Hollies are grafted, scions taken from well-fruited trees. Properly pruned either with foliage laying close to ground or tree shape. Our trees produce berries the first year. Our Hollies are young, thrifty, thus enabling us to transplant easily. We have a great many of these in sizes ranging from 2 to 3 feet to 12 to 14 feet.

ILEX EAST PALATKA—A beautiful Holly with few thorns, very glossy foliage. A very heavy bearer of fruit. Fruit large and brilliant red color. Can make nice sheared specimens in this variety.

ILEX HOWARDI—A popular variety because it is a very much improved strain of the *Ilex Opaca* (America). Foliage glossy and dark green. Dark red berries and thorny leaves.

East Palatka

ILEX OPACA (America)—Light green foliage and thorny. Grows more as a tree than other varieties.

Wire - Balling

We strongly recommend the use of wire-balls on all larger size of shade trees and ornamentals. This has proven to be a safeguard in the transplanting of large trees and shrubs without losing them. By wiring, we can enlarge the regular size ball that is firm.

Prices on wire-balling:

24 inch ball \$3.00

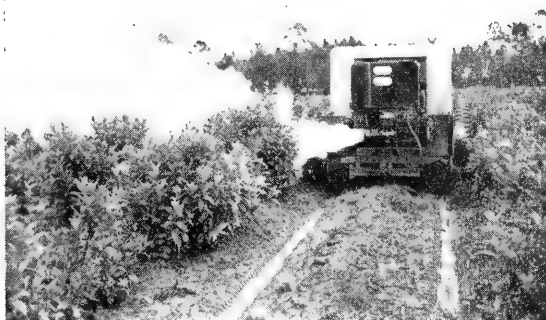

30 inch ball 3.50

36 inch ball 3.75

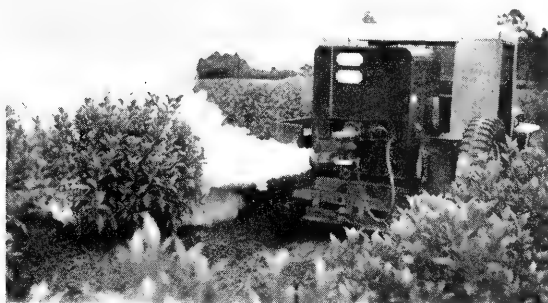

48 inch ball 4.00

Spraying

Produces Plant Beauty and Quality

A contributing factor in the making of the quality in our plant material is attributed to this new FOG machine. We have discovered through costly experiments that regular spraying produces quality in plants as well as the freeing of disease and insects. From certain kinds of spray material we have found them to be very vitalizing and at the same time conquerors of destructive scales and diseases.

As you have experienced, spraying in the past has been very expensive and not very thorough in most instances. This new method is very reasonable and does such a thorough job. Enough can be saved in spray materials alone to pay for such an operation in a very short time, not counting anything saved in your labor costs. We would be very happy for you to visit us and show you exactly how this machine operates.

W. B. Carpenter
Chief Chemist

FLORAHOME PEAT HUMUS has been available to the trade for the past several years, and during that time we have established many customers who use it each season in their propagating beds, Azalea and Camellia beds, and even for other purposes. We have many testimonials from customers who prefer it to any Humus ever offered and through mouth advertisement such as this we are increasing our regular list of customers for our Humus.

We advise ordering in carload lots as much extra yardage is added without cost in each car. We can ship a minimum car of 30 tons or a maximum car of 40 tons. We guarantee this Peat Humus to be absolutely free of sand, seeds, roots and other non-essential ingredients. Before pulverizing this humus, it possesses a fibrous appearance and shows its absolute decayed vegetation. One cubic yard of semi-dry humus will weigh approximately 700 pounds or one cubic yard of dry humus will weigh approximately 350 pounds. Prices below are loaded in freight cars, F.O.B., Florahome, Florida.

Semi-dry Peat Humus \$7.00 per ton.

Semi-dry Peat Humus \$10.00 per ton sacked.
